5 Applicant: Chia-Fu Chang
Filing Date: 06/25/2003 Art Unit: 2875
Serial No.: 10/604,093 Docket No.: ELUP0003USA

10 Title: LED LIGHT SOURCE HAVING A HEAT SINK

To: Commissioner for Patents
P.O. BOX 1450
Alexandria, VA 22313-1450

15 Subject: Information disclosure statement Under
37C.F.R. §1.56.

20 Dear Sir:

This is an Information Disclosure Statement in accordance with the duty to disclose information material to patentability under 37 C.F.R. §1.56. The Applicant wishes to
25 make of record the document listed on the accompanying form PTO/SB/08. It is respectfully requested that the Examiner initials the cited reference on the form and that it be made of record in the application and that a copy of the initialed form be sent to the Applicant with the next communication from
30 the Examiner.

Since the IDS is filed before the mailing date of a first

Office action on the merits, consideration of the information disclosure statement is hereby requested according to 37C.F.R. §1.97(b). The prior art patent contained in the information disclosure statement is cited in a communication
5 from the Taiwan Intellectual Property Office on Apr. 27, 2004. The Applicant sincerely hopes that the Examiner can consider the item contained in the information disclosure statement.

According to the requirement set forth in 37C.F.R. §1.98,
10 the Applicant is submitting copy of the cited reference (Taiwan Patent Nos. 446197) and a concise explanation of the relevance in this application hereinafter.

TP No. 446197 discloses an LED device, comprising a heat
15 sink, a concavity installed on the heat sink, at least one LED chip set up within the concavity, a print circuit board set up on the heat sink, and the LED chip being fixed on the heat sink directly or fixed on the heat sink by inserting a sub-mount between the LED chip and the heat sink, wherein the
20 sub-mount is capable of transmitting the heat generated by the LED chip to the heat sink. In view of Fig. 2A, 2B, 2C, 2E, 4B, and 6A, it is very obvious that the LED chip is set up within a concavity.

25 The amended claim 1 of the present invention is repeated below.

1. A light emitting diode (LED) light source comprising:
a printed circuit board (PCB) having a plurality of holes;
30 a heat sink connected under the PCB for conducting heat;
a plurality of heat conductors protruding the heat sink
upward and formed on the heat sink corresponding to

each hole of the PCB for conducting heat, each heat conductor having a basin on the topside; and at least one LED chip attached to the basin of the heat conductor.

5

Compared with TP No. 446197, the heat conductors comprised in the present LED light source protrude the heat sink, while the LED chip is set up within a concavity in TP No. 446197. The heat sink and the heat conductors of the claimed invention can be formed by pattern flood upward. The illustration below is a simple description.

15

20

The oblique lines on the illustration represent the area of the claimed heat sink that contacts the lampshade, assuming the area is A.

25

In TP No. 446197, if the concavities are formed by etching or carving, the cost will be very high. However, if the concavities in TP No. 446197 are formed by pattern flood as well, the heat sink will protrude the heat sink downward. The illustration below is a simple description.

30

The oblique lines on the illustration represent the area of the cited heat sink that contacts the lampshade, assuming the
5 area is B.

Comparing the two illustrations above, it is obvious that the area B is smaller than the area A. That is, the contacting area between the heat sink and the lampshade in the claimed
10 invention is larger than that in TP No. 446197. The larger contacting area between the heat sink and the lampshade, the better the heat sink can transfer heat further. Therefore, it is very obvious that the heat sink of the present invention is not only different from the heat sink in TP No. 446197,
15 but the effect of heat conduction is improved in the present invention as well.

Respectfully Submitted,

20

Winston Hsu
